

Some basic insights and analysis on wrangled data

WeRateDogs is a Twitter account that rates people's dogs with a humorous comment about the dog. These ratings almost always have a denominator of 10. The numerators, though? Almost always greater than 10. 11/10, 12/10, 13/10, etc. Why? Because "[they're good dogs Brent](#)." WeRateDogs has over 4 million followers and has received international media coverage.

Let's talk about how active is that account over the course of the year

We can see that this account is most active in December with the greatest number of tweets in that month

Most active year according to our dataset was 2016 with a number of tweets of 962

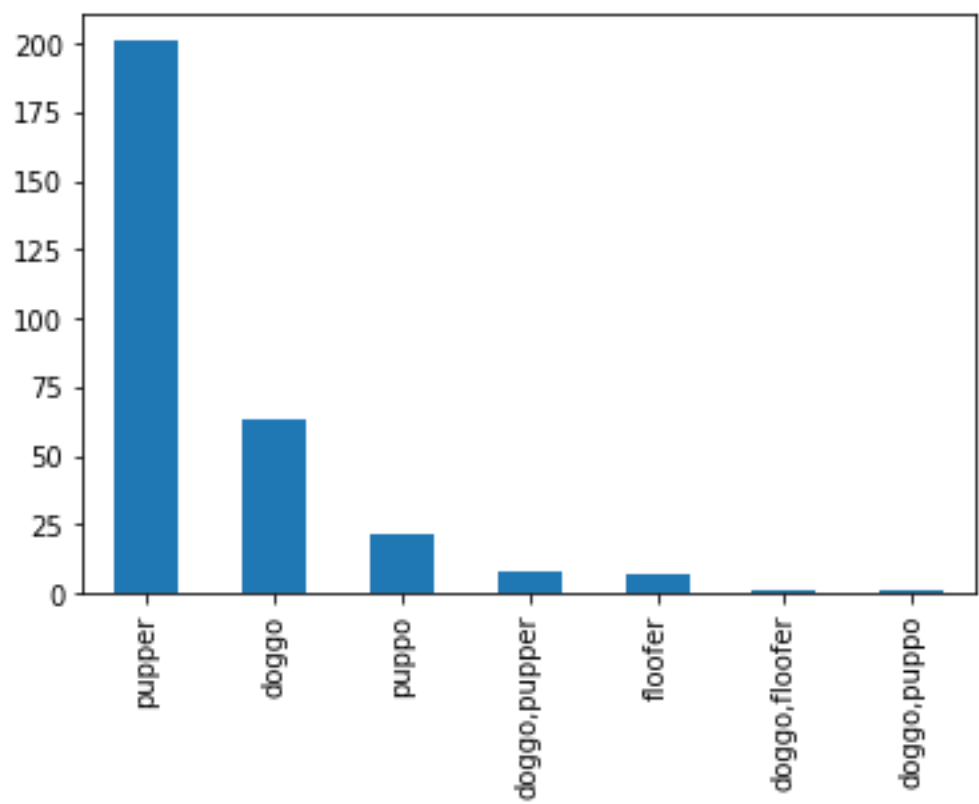

Year	Nu. Of tweets
2016	962
2015	955
2017	354

As for the rating and their unique system the rating reached an incredible unheard-of number of 1776/10 for this tweet which I didn't believe its rating at first till I saw it with my own eyes

Incredible rating for a cute dog

furthermore most of the tweets that contain photos are of puppies which we can see clearly shown in the below graph

According to our image prediction algorithm the most tweeted type of dogs are

- 1-golden_retriever
- 2-Labrador_retriever
- 3-Pembroke
